

Comet Welding Ltd. was started in 1982 with one portable welding unit servicing customers in Central Alberta. Since then, it has expanded to our current 7,000 sq. ft. modern welding facility, staffed by qualified employees offering a combined total of 80 years of welding and fabricating experience.

Independently owned by Gaylord and Caroline Hulsman, we take pride in providing our customers with the best service possible. We have served businesses of all sizes and job requirements throughout Alberta and the United States.

We specialize in custom oilfield truck rig-ups and custom fabrication, but we complete a wide variety of other jobs, as well, both large and small. If you can dream it, we will design and build it!

Comet Welding Ltd. is committed to a strong and healthy safety program, meeting or exceeding all industry requirements and codes.

Our philosophy is that our success is dependent on the complete satisfaction of every customer.
